Standard & Guide for Judging Meat Classes Meat Pens

The four factors, in the order of their importance, for judging meat pens, are as follows:

- Meattype
- Condition
- Uniformity
- Fur

Meat pens shall consist of three rabbits, all of the same breed and variety. Broken meat pens must also be of the same variety. A meat pen does not necessarily have to come from the same litter. Age limit 10 weeks. Minimum weight 3.5 pounds each. Maximum weight 5.5 pounds each. All rabbits must be weighed in the presence of the judge.

Point Schedule for Judging Meat Pens

Meat Type . . . . . 40 Points
Condition of Flesh.....30 Points
Uniformity of body and weight . . . . . .20 Points
Fur . . . . . 10 Points
Total . . . . . 100 Points

MeatType–Points40: Type is the most important factor in judging these pens, the best meat type is found in those fryers that are compact and short, with the body well filled, rounded, and solidly fleshed. Smooth, well filled hips and good depth of body are especially important. Protruding hip bones or prominent “razor backs” are serious faults. The width and depth of loin, thickness of the hindquarters, and well developed shoulders are important to the meat carrying type of the fryer. The hindquarters are most important, loin second, and forequarters are third in importance.

Condition–
Points30:Allfryersinapenmustbeinprimecondition.Thisreflectsthecareandmanagementpracticesofthebreeder. The fryers must be firm and solid. They must not show any signs of flabbiness, softness, looseness, or pottiness. The pelt must be tight over the body and the animals must be clean and show no signs of neglect or disease. It denotes the ability of the breeder to pick three fryers for each pen which have the other three qualities in equal amounts, and will reflectthegeneralqualityoftheherdfromwhichtheycame

Uniformity - Points 20: Must be present in weight, size, appearance, condition, meat types, and fur, and should be as similar in all respects as possible.

Fur – Points 10: Fur should conform to the breed description in the Standard and be uniform on all three animals in the pen.

Disqualifications from Competition–All ARBA Disqualifications form Competition and breed Disqualifications from Competition apply to each meat pen, with the following exceptions:

Body smut on Californian or Himalayan marked animals. Non descended testicles on bucks.

Note: On Californian meat pens and single fryers, the frosting due to genetic characteristics or nest box chilling shall not be a disqualification. Such animals are to compete as if their pelts were white, as called for in the standard.

If anyone rabbit in the pen is overweight or underweight the entire pen is disqualified from competition. If anyone rabbit in the pen is disqualified from Competition, the entire pen becomes disqualified.
All ARBA General Faults apply to each meat pen.
